Plan Introduction

When it comes to all things weight loss, the simplest, fastest way to make impactful, lasting change is to form habits you can actually stick with for life. That's why this plan includes an easy-to-follow meal planning guide as a good starting point.

This full week of healthy and delicious food will take the guesswork out of grocery shopping and prepping with nutritionist-approved breakfast, lunch, and dinner ideas. Keep in mind to determine the appropriate portion sizes, according to your weight loss goals, activity levels, and individual requirements.

Tips for healthy eating

Choose these foods more often:

- **Vegetables and fruits.** Fill half your plate with vegetables at most meals. Choose fresh, frozen, or canned with no added sugar or salt.
- **Whole grains** like barley, oats, and whole grain breads, pastas, and brown rice.
- **Plant proteins** like beans, peas, lentils, tofu, and other soy foods.
- **Lean animal proteins** like fish, seafood, eggs, chicken, and turkey. Eat fish at least 2 times a week.
- **Healthy fats** like nuts and seeds and their butters; avocados; oils like olive, canola, avocado, and walnut

Limit these foods:

- **Limit foods higher in saturated fat** like red meat (beef and pork); skin on poultry; bacon, sausage, and other processed meats; and higher fat dairy products.
- **Limit foods with trans fats** like hard margarine, some store-bought baked foods, chips, cookies, and deep fried foods.
- **Add little or no salt to cooking** or to your plate of food. Use flavourings like herbs, spices, garlic, lemon, or vinegar.
- **Read labels to limit higher sodium foods** like some processed foods, canned foods, and fast food.
- **Limit foods and drinks with added sugars** like juice, pop, candy, desserts, sweet baked foods, and sweet sauces.
- **Choose water, milk, tea, or coffee**, and drinks with **no added sugar**.

Healthy snacks are lower in sugar, unhealthy fats, and salt (sodium).

Not everyone needs a snack. Eating healthy snacks can help you:

- **Get important nutrients** like fibre, vitamins, minerals, and healthy fats.
- **Satisfy hunger** if there is a long time between your meals.
